*Electronic Source Document Application (ez-Source Docx) integrated with Electronic Data Capture (ez-EDC) application developed by Alpha Clinical Systems in collaboration with a USA based CRO, helps to capture and create genuine source documents that integrated with electronic Case Report Form to create error-free clinical data at the Investigative Site*

## Key Features:

- Electronic Source Document application for Clinical Research without the need of EMR
- Pre-designed templates for source data collection for the entire life cycle of Clinical Study Protocol
- Unparalleled reliability for verification, efficiency and customizability
- Pre-built clinical templates and workflow ensure complete, accurate documentation stored in a standard format
- Source data collection to meet the required clinical research guidelines for data capture
- Eligibility verification
- Appointment and visit scheduler
- Lab order integration
- Document management
- Incorporated with ICD9 and CPT
- Confirms to ICH GCP guidelines, Title 21 CFR Part 11 and regulatory requirements
- Audit trail section for uninterrupted recording all the activities in the source document and used for FDA inspections and internal audits as well.

## Integration with ez-EDC:

Our ez-SourceDocx integrates with our ez-EDC seamlessly providing a complete suite of Clinical Data Capture for the clinical trials at Investigative sites. The application promises secured and efficient quality data for clinical research.
